Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is a first office action in response to application no. 10/672,820 filed on September 26, 2003 in which claims 1-32 are presented for examination.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Monroe et al. (US Patent Application Publication no. 2006/0067404 A1).

Regarding claim 1, Monroe discloses in Fig. 3 a method for using global motion predictors (GMPs) in predictive motion estimation for the compression of video, the

Art Unit: 2621

method comprising (See Monro [0060], lines 10-11) receiving video frames; generating a set of global motion parameters for a current frame of video (See [0041], [0060] lines 8-10 and fig. 3, item 308); in response to the global motion parameters, generating GMPs for image blocks in the current frame (See [0041], [0060] lines 8-10 and fig. 3, item 308); estimating motion between the current frame and a reference frame (See fig. 3, item 306 and [0060], lines 6); subtracting reference blocks in the reference frame from image blocks in the current frame, leaving residual image blocks (See [0060], lines 10-13); and, encoding the residual image blocks in a video stream (See [0060], lines 10-14 and fig. 3, item 316).

3. Claims 2-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 17-32 are allowed.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Panasupone (US Patent Application Publication no.2003/0202591 A1). Teaches methods and apparatus for efficient global motion compensation encoding and associated decoding.
